SUMMARY

An Enthusiastic web and android developer with a focus on attractive experiences for users and solving problems creatively. I have handled several personal and campus mobile and web development projects related to information systems, portfolio page, and company landing page with a wide range of cutting-edge technology features. Skilled in agile processes, backend/frontend software development with Kotlin, Laravel and ReactJS, and creating Android application that integrate with cloud services and APIs. With hard and soft skills that I have learned, used, and polished over the last few years, I would like to develop my career in or as a Software Developer.
